Manhattan Surgical Hospital (MSH) Recognized Nationally with “Five Star” Rating from Medicare

MANHATTAN, Kan. — For the second time in less than a year, Manhattan Surgical Hospital has received national recognition for its quality of patient care. This time, the Centers for Medicare and Medicaid Services (CMS) designated the hospital as a “Five Star” facility in its latest rankings released last month. The recognition puts Manhattan Surgical Hospital in the top 8% in the country for its overall hospital-level quality. (see graphic below)

The Overall Hospital Rating from CMS provides consumers with a simple star rating generated by combining multiple dimensions of quality into a single summary score. Star rankings are based on 62 quality measures across seven categories: effectiveness of care, efficient use of imaging, mortality, patient satisfaction, readmissions, safety and timeliness of care.

According to the CMS web site, the goal of the star rating system is to improve the usability and interpretability of information posted on Hospital Compare, a website designed for consumers to use along with their healthcare provider to make decisions on where to receive care. Only seven Kansas hospitals received five stars in the latest rankings

According to Chris Stipe, the hospital’s Chief Executive Officer, “This means patients are getting best care in the country right here in Manhattan! Why would you choose to go anywhere else?”

Additionally, last fall, Manhattan Surgical Hospital was rated as a “High Performing” hospital for total knee replacement by U.S. News & World Report. This designation indicates a hospital was significantly better than the national average in a given procedure or condition.

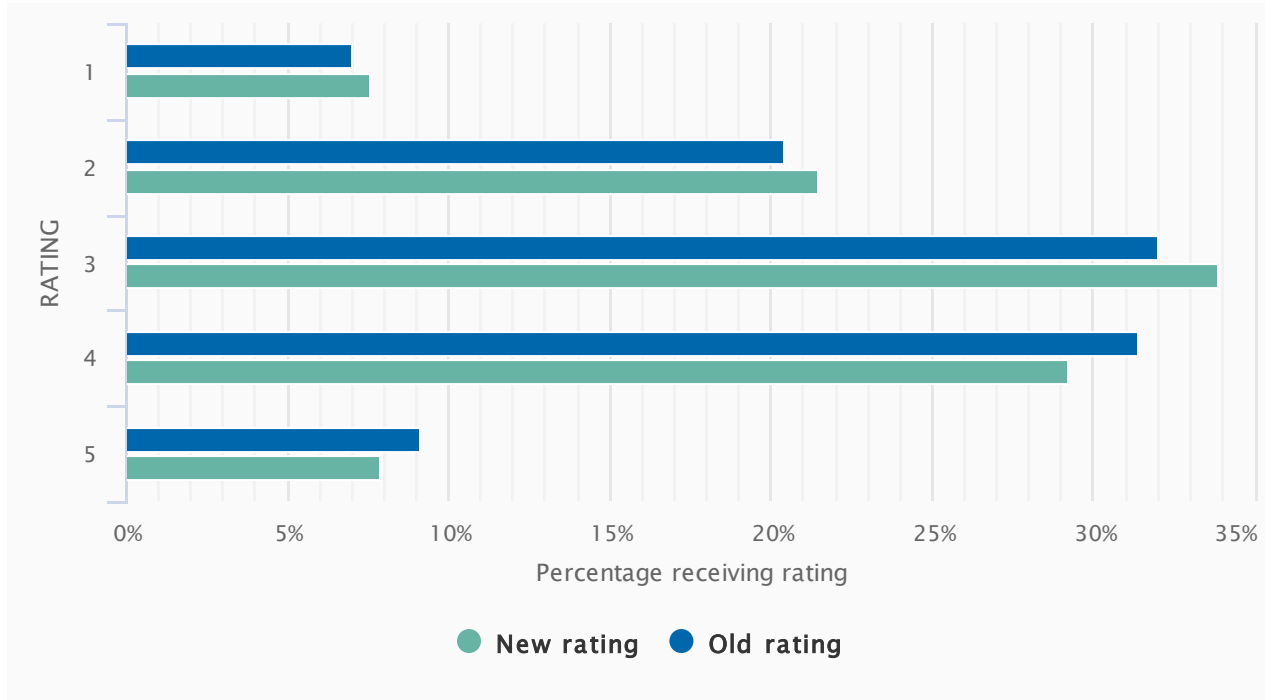

“Manhattan Surgical Hospital has always been dedicated to the highest level of clinical care and the best patient experience. These two prestigious recognitions are a culmination of many years of hard work, and they reflect our constant pursuit of excellence,” said Dr. Jamie McAtee, Board Chairman.

These rankings are likely not a surprise to the patients that have trusted their care to the physician-owned, Manhattan Surgical Hospital over the last eighteen years. “Our dedicated staff really makes it happen each and every day for their patients,” Stipe added.
